

Serial No. 10/566,070  
Office Action dated: May 13, 2009  
Amendment B dated: August 13, 2009

IN THE ABSTRACT:

Please replace the abstract with the following amended abstract:

A method for producing a superconducting inductive component having at least two ~~plots~~ terminals, the component including at least one line segment incorporating at least one ~~plot~~ terminal of the component, the line segment constituting a conducting or superconducting layer within a stack of alternately superconducting and insulating films.
